MATERIALS & RESOURCES 008 - FRONT

- Provide an easily accessible area that serves the entire building and is dedicated to the separation, collection, and storage of materials, for recycling including (at a minimum) paper, corrugated cardboard, glass, plastics, and metals.

MATERIALS & RESOURCES 002 - REAR

Facilitate the reduction of waste generated by building occupants that is hauled to and disposed of in landfills.

MATERIALS & RESOURCES 001 - REAR

There is no standard referenced for this credit

MATERIALS & RESOURCES 004 - REAR

Coordinate the size and functionality of the recycling areas with the anticipated collection services for glass, plastic, office paper, newspaper, cardboard, and organic wastes to maximize the effectiveness of the dedicated areas. Consider employing cardboard bailers, aluminum can crushers, recycling chutes and collection bins at individual workstations to further enhance the recycling program.

MATERIALS & RESOURCES 003 - REAR

**Requirements:**  
Coming soon!!

MATERIALS & RESOURCES 006 - REAR

Extend the life cycle of existing building stock, conserve resources, retain cultural resources, reduce waste, and reduce environmental impacts of new buildings as they relate to materials manufacturing and transport.

MATERIALS & RESOURCES 005 - REAR

There is no standard referenced for this credit

MATERIALS & RESOURCES 008 - REAR

Consider reuse of existing, previously occupied buildings, including structure, envelope and elements. Remove elements that pose contamination risk to building occupants and upgrade components that would improve energy and water efficiency such as windows, mechanical systems and plumbing fixtures.
