

LEED-NC V 2.2 EXAM FLASHCARDS

PRINTING INSTRUCTIONS

The following flash cards are laid out eight cards to a page with the questions on the front, answers on the back. We have designed the questions and answers to align when printed on both sides. If your printer features a duplex mode (double-sided), this is the easiest way to ensure alignment.

If your printer does not have this feature, select the print odd pages from the print range option in the print menu. Then, reinsert the sheets and follow the same procedures as before and print the even pages.
